Summary

Android mobile developer focused on building production apps with Kotlin and Java. I care about clean architecture, performance and shipping features that genuinely improve the user experience. I also have backend experience with Java and Spring Boot, and have contributed to web projects with PHP/Laravel and React. Comfortable in agile teams and used to taking features from design to release.

Experience

Kotlin/Java Developer — VIETTEL PERÚ S.A.C.

Aug 2025 – Present

Mobile application development

- Design and develop Android applications in Kotlin, focusing on smooth UX and stable performance.
- Collaborate within an agile squad, consistently delivering features ahead of schedule.
- Optimize app performance, reducing load times by ~25% through profiling and refactoring.
- Integrate third-party APIs to extend product capabilities and streamline user flows.
- Build backend-facing features in Java, improving system efficiency by ~30%.

PHP Developer — Devdatep Consulting

Dec 2024 – Jul 2025

Web development with React, MySQL and Laravel

- Developed scalable web applications in PHP/Laravel, improving overall efficiency of internal tools.
- Designed and tuned relational database schemas in MySQL, cutting query response times by ~30%.
- Built interactive front-ends with React, integrating them with REST APIs.
- Worked in an agile team, delivering milestones consistently before deadlines.

Java Developer — Consultora Tecnológica JH

Dec 2023 – Nov 2024

Desktop application development with Java

- Implemented new modules that reduced operational costs for end clients by ~20%.
- Refactored legacy code and tuned JVM settings, lowering system failure rates by ~15%.
- Wrote and maintained unit tests, raising overall software quality by ~40%.

Volunteer Web Developer — Warmakuna Hope

Jun 2023 – Nov 2023

WordPress sites for local NGOs

- Built responsive WordPress websites for local NGOs, increasing their online visibility.
- Contributed to a small web-app initiative, improving user experience for visitors.
- Ran usability tests, lifting user satisfaction scores by ~25%.

Education

Universidad Tecnológica del Perú

Dec 2019 – Dec 2024

Bachelor's Degree in Systems Engineering.

Centro Cultural Británico

Dec 2017 – Dec 2019

English language studies.
